# THE MULTI AWARD WINNING SHAKER BOTTLE.

The magic is in the ShakeSphere Capsule shape.

Here's how a ShakeSphere bottle works. Instead of using mixing accessories like a wire ball or mesh grid, our bottles use the centrifugal force generated by a round, no-corners design to break down powder supplements in a mere five seconds of shaking. Shake for another five seconds and you can even enjoy soft fruit in your shake for the ultimate post-workout boost.

The unique capsule design of our bottles is patented, meaning there won't be anything else like it on the market and you'll stand out from the crowd. The capsule shape is moulded using a high-quality plastic which is free from BPA, protecting you from harmful diseases and making you feel good. At the top of the capsule, you'll find a sturdy slide cap which ensures your bottle will never leak wherever you take it.

You may think having no mixing accessories means a lot of wasted shake. You'd be wrong. Because there are no corners, nothing gets left in the bottle when you've finished with it. This not only means you spend less time cleaning it, but also saves you money as you need less powder in the long-run. No waste also prevents the build-up of the foul smells which develop when undissolved powder lingers in the corners of your typical shaker bottle. It's no wonder we were voted Best Protein Shaker by Men's Health and have already received 9 awards recognising our ShakeSphere range as the best on the market right now.

[shakesphere.in](http://shakesphere.in)

### 2 OPPOSING HALF HEMISPHERES

Capsule shape, easy clean, easy mix.

### NO MIXING APPARATUS REQUIRED

Mixes using the capsule shape

### ZERO WASTED MIXTURE

Nothing wasted saving the user money.

### ZERO RESIDUAL SMELL

Nothing gets stuck to cause smell.

### EASY CLEAN

200- 300mls shake with soapy water pour out rinse and it is instantly reusable.

### DESIRABLE FINISHING

Matte and metallic finish. Tactile, functional generates organic marketing posts.

### FAMILY RUN BUSINESS

# COOLER SHAKER

shakesphere.in

# COOLER SHAKER

The Cooler Shaker is a double wall Tritan Bottle it has the same great features as you would expect from ShakeSphere, mixing your supplements and pureeing soft fruits without the need for mixing balls or mesh grids, easy to clean due to the opposing half hemispheres with a hygienic slide cap.

Cooler Shaker locks in food safe gel capsules between the double walls. When Cooler Shaker is placed into the freezer in just a few hours the gel is frozen locking in cooled air between the frozen expanded gel capsules. Add your chosen drink or mix. The cooling system will keep your drink colder for longer.

Not suitable for boiling liquids (although we do have Tumbler Steel which is suitable for this).
